62893	9/8/2025	9/19/2025	Phillip Wells	Other Hazardous Air	/Johnson	KCRO	CS	Other
Concerned Party:		David Colwell						
Concern Info:		CP reported a concern about fly ash on a neighbors property. He stated the previous owner of the property, Bohammon (only knew his last name, CP had their contact info written on a postcard but he couldn't find it at the time of the concern call) had used fly ash to build their barn's floor (to strengthen the concrete) and left a large pile of fly ash on the property when he sold it to Phillip Wells (current property owner). CP stated that Bohammon told him he planned to make a pond using the fly ash but didn't complete the project and left the pile of fly ash when he sold in 2025.						
		There's a crop field used for local produce next to the property and Colwell is worried about the impact of the loose fly ash on their health. Colwell was eating vegetables from the property and wasn't sure if his food was safe to consume.						
		Colwell noted that this Bohammon was healthy when he first came into town from Texas and by the time he was selling he was skin and bones and dealing with cancer treatments. He's worried the fly ash was the cause of his rapidly declining health and is worried for anyone who may be impacted. [sic]						
Conclusions:		As long as the fly ash is used for the intended purpose, there are no violations. The current owner did not have it put on site. No violations.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62934	9/11/2025	9/16/2025	Isonova	Odor	Verona /Lawrence	SWRO	JW	Site Visit
Concerned Party:		Stone						
Concern Info:		Isonova is operating for 30-45 minutes at a time then shutting down. Once the plant stops, the complainant notices odors in the air for the past 1.5 week beginning shortly after Labor Day. Odor is moving SSE at 2 mph based on KY3 weather app. [sic]						
Conclusions:		SharePoint #15005 I did not observe any violations during this investigation. No action is required.

62947	9/12/2025	9/17/2025	Double O Organics	Odor	Monett /Lawrence	SWRO	JW	Email
Concerned Party:		Anonymous						
Concern Info:		From online webform: "It stinks all around my house and I see them doing something in these fields in the middle of the night" [sic]						
Conclusions:		SharePoint #15043 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62954	9/15/2025	9/16/2025	Unknown - 32nd Street	Odor	Joplin /Jasper	SWRO	BD	Memo
Concerned Party:		Glenda Parish						
Concern Info:		Caller complains of an odor like a packing plant detectable at her home, especially in the early evenings and weekends. The caller specified that the odor did not smell like dog food and that it gets worse as she drives south towards 32nd St. No specific facility was suggested by the CP. [sic]						
Conclusions:		SharePoint #15067 No odors were observed at the time of the investigation. Odor surveillance in the area will continue.

Conclusions:		SharePoint #15062						
		I did not observe any violations during this investigation. No action is required.						
Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62956	9/15/2025	9/19/2025	Unknown	Open Burning	Linn Creek	SWRO	CR	Site Visit
					/Camden			
Concerned Party:		Anonymous						
Concern Info:		Caller is concerned about his health and that of his asthmatic mother since neighbors have begun burning every morning. Caller states that the responsible party is burning tires and shingles and producing large amounts of black smoke that are preventing outdoor yard work. Caller states that he called previously, but the issue persists. Likely related to solid waste concerns #9370 and #9382, but not verifiable. [sic]						
Conclusions:		SharePoint #15058						
		No illegal open burning activities were observed. No further action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62977	9/16/2025	9/17/2025	City of Portageville	Water Discoloration Taste and Odors Particulates	Portageville /New Madrid	SERO	DC	Communication In Person
Concerned Party:		William Koller						
Concern Info:		My name is William Koller and I live in Portageville, Mo. Our water is brown, has sediments & odor issues. Our city water has an ongoing issue consisting of being brown, sediments, and odor. Are there any resources available to assist our municipality in identifying and correcting this issue. We, as a community, have been given multiple causes and multiple solutions for the brown water. We've been told it is because of line leaks, or line disruption caused by hydrant usage by the fire department dislodging contaminants in the lines. We have also been told it is a build up in the iron pipes in our house lines even though some houses (including mine) are newer and have copper/pex water lines. Some of the recommended solutions have been to flush hydrants or to drain our water heaters to flush out contaminants even though the cold water supply is the main source of brown water. It has been suggested that we used bottled water, which is all well and good until you've got two adults and four kids trying to take a bath or shower. Our clothes have been stained, our home filters can't keep up and are very expensive. Also note that this brown/gritty water is not a constant problem. Meaning the water is fine for a week or so and then it's brown for a couple of days, up to a week or so. I personally think this would indicate an issue at the pumping station or with the towns filtration. Meaning if they are swapping pumps or back flushing filters the problem. May be with one or the other. If you would like to see some examples of just how bad our issue is, a search on Facebook for "Portageville Water" will give some examples with pictures. I would not recommend reading the posts as some are not exactly politely written. We are frustrated and have lost patience with the ineffective and sometimes dismissive, responses from the municipality. Any help you may be able to provide would be greatly appreciated [sic]						
Conclusions:		The concern only had an email for contacting the concerned party so I sent an email best addressing the issues in the concern. I told the concerned party to reach out if they wished to communicate further or I would email them with my findings after visiting the town the next day. I had a response from the CP with a number this morning. The CP stated they were not concerned about the safety of the water. I went to the city of Portageville and met with the operator Jimmy Wyman. I asked Jimmy about any issues he might be having and he informed me that he felt the filter media was shot and not removing the iron. While at the plant, I checked the water, the iron was 1.00 mg/L. The manganese was 0.079 mg/L, free chlorine was 2.10 mg/L, and the total chlorine was 2.40 mg/L.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62978	9/17/2025	9/24/2025	Sonny Summers and Delores Petty	Open Burning	Eagle Rock /Barry	SWRO	JW	Phone Conversation
Concerned Party:		Ashley						
Concern Info:		Caller states that Martin Montague is disposing of his regulated burned waste (see concern #14591) by sending it to a neighbor's property down the street. Montague is expected to dispose of the waste to a landfill, but it is allegedly being burned at a nearby mobile home instead. The caller is unsure whether Montague or the tenant of the other mobile home is responsible for burning this regulated waste. [sic]						
Conclusions:		SharePoint #15089 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
62980	9/17/2025	9/26/2025	Parker Mortuary	Particulates	Joplin /Jasper	SWRO	BD	Communication In Person
Concerned Party:		Joplin HD						
Concern Info:		Devin with the Joplin HD called with concerned citizens reporting soot and excessive gas odor coming from Parker Mortuary (1502 S Joplin Ave , Joplin, +14176234321) The black soot lands on homes within the residential surrounding area and leaved black residue [sic]						
Conclusions:		SharePoint #15093 No evidence of fugitive emissions or excessive opacity were observed at the time of the investigation. No further action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
63005	9/16/2025	9/18/2025	North Terrace Property Management	Asbestos	Grandview /Jackson	KCRO	JS	Phone Conversation
Concerned Party: Bruce Dean Concern Info: Dear Ms. Poole, Thank you for your response regarding the recent ceiling collapse at Douglas Place Apartments, 13900 Grandboro Lane, Apt. 95, Grandview, MO 64030. While I appreciate your attention, the seriousness of the situation requires immediate clarification and compliance with federal and state standards. Asbestos Testing • Under EPA regulations (40 CFR Part 763, AHERA), suspected asbestos-containing materials must be professionally tested. • Has a certified asbestos inspector tested the collapsed ceiling material, insulation, or joint compounds? • If not, when will this testing be scheduled, and will written lab results be provided? Cleanup Methods • According to OSHA 29 CFR 1910.1001, cleanup of asbestos-containing debris requires wet methods, HEPA vacuuming, and proper disposal. • What cleanup methods were used after the collapse? • Were OSHA/EPA-approved procedures followed, and was a licensed environmental remediation company retained? Relocation Safety • HUD Fair Housing regulations (24 CFR Part 100) require habitable housing for tenants. • Has the alternate unit you suggested been inspected for the same ceiling issues (use of nails instead of screws, aging insulation, or asbestos risk)? • Will written inspection reports be provided before relocation? Repairs & Timeline • Under HUD Housing Quality Standards (24 CFR 982.401), landlords must maintain units free of hazards. • What is the timeline for permanent repair of all affected ceilings (living room, bedrooms, kitchen)? • What contractor will perform the work, and are they licensed for asbestos handling? Tenant Health & ADA Compliance • The ADA (42 U.S.C. § 12132) and Fair Housing Act (42 U.S.C. § 3604(f)) require accommodations for tenants with disabilities. • My son is a high-functioning autistic adult with serious health vulnerabilities. • What accommodations will you provide, including relocation support, rent adjustments, and medical protections? Documentation Please provide copies of: • The full City of Grandview inspection report. • Any internal work orders, maintenance logs, or contractor notes related to this ceiling. • Air quality or asbestos-related testing results. Request for Response Given the seriousness of these issues and the regulatory obligations under HUD, ADA, EPA, and OSHA, I respectfully request a written response within three (3) business days. [sic] Conclusions: After a portion of the ceiling collapsed, North Terrace Property Management proceeded to remove the remaining ceiling without first inspecting for asbestos. A report documenting this violation will be issued to North Terrace Property Management, which will require a written response with a compliance plan to help ensure future compliance.								

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
63008	9/18/2025	9/24/2025	NF Protein	Odor	Nevada /Vernon	SWRO	JW	Phone Conversation
Concerned Party:		Christine Deboutez						
Concern Info:		Concerned Party stated that there is a strong smell coming from a protein plant and that they are unable to go outside due to the intensity of the smell. [sic]						
Conclusions:		SharePoint #15118 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
63011	9/16/2025	9/17/2025	Hayden Hager	Asbestos	King City /Gentry	KCRO	CK	Other UF
Concerned Party:		Anonymous						
Concern Info:		Forwarded from EPA, "Demolition of old building is releasing loose insulation all over the street and young worker is demoing and carrying out shovels full of the insulation and debris and want to make sure he is safe. Looks as if it were asbestos insulation. It is the old Shear Perfection building. [sic]						
Conclusions:		The responsible party, Hayden Hager, confirmed that an asbestos inspection was not conducted on the commercial building prior to remodel work beginning. He was provided with regulatory information and called and had an asbestos inspection conducted and is awaiting results. An Unsatisfactory Findings with no response required is being issued. Hager has filled out and returned the violation acknowledgment form per email.

Concerned Party:		Joe Bronefinger						
Concern Info:		Voicemail received at 7:04 a.m. this morning, 09-19-2025. Joe Bronefinger (not exactly sure on the last name) from Verona, Missouri area and he is Northwest of the Isonova Plant. He says the Isonova Plant is putting out a smell this whole week, last night it was horrible and says it turns your stomach. [sic]						
Conclusions:		SharePoint #15124 I did not observe any violations during this investigation. No action is required.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
63021	9/22/2025	9/22/2025	Michael K. Cary	Open Dumps Open Burning	Kansas City /Jackson	KCRO	CS	Email
Concerned Party:		Robert Fleming						
Concern Info:		Via Webform email - Submitted at 1:34 pm Sunday, September 21, 2025 - Date of Incident or First Noticed: 01/01/2021 Michael Cary located at 8801 E 47th Street – Kansas City – 64129 The community surrounding 8801 E 47th Street in Kansas City has endured six years of persistent issues with the property owner, Michael Cary, who has allowed the site to become a hazardous dump and homeless camp. Despite repeated appeals to city officials and multiple court cases, problems such as pollution, open burning, improper storage of chemicals, and disruptive activity continue to threaten the health, safety, and daily lives of residents. The situation is exacerbated by illegal activity, neglect of property boundaries, and exploitation of government benefits, leaving the neighborhood feeling overlooked and vulnerable. Despite numerous court cases regarding this property, city officials have ignored ongoing issues for six years. This is not unique in Kansas City, but repeated calls to police and fire services for nuisances such as gunfire, open-air burning, increased homelessness, and constant noise from this property and its owner have become overwhelming and disruptive to our community and daily lives. Although property owners have rights, Mr. Cary repeatedly ignores summons and disrupts our community at all hours. He permits his guests to damage neighbors' fences and vehicles, lets animals roam freely causing harm to stray cats and wildlife, and allows dumping and unauthorized use of his land. He harbors fugitives, brings stolen goods onto the property, and enables others to use his address for government benefits—sometimes for people who do not live there. The campers lack proper documentation or tax records. His actions show disregard for our neighborhood and exploit others. [sic]						
Conclusions:		This was referred to the City of Kansas City for their Homeless Task Force and for Code Enforcement to address the open burning.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
63070	9/19/2025	9/19/2025	Logan Orr	Asbestos Unpermitted Open Burning	Lowry City /St. Clair	SWRO	JW	Phone Conversation LOW
Concerned Party:		Anonymous						
Concern Info:		Caller states that Logan Orr is renovating old buildings on or near 310 S Main St in Lowry City. Orr is allegedly burning renovation waste in an empty gasoline storage tank that serves as a makeshift incinerator. The caller states that Orr has been renovating buildings and burning the waste for at least 6 months. [sic]						
Conclusions:		SharePoint #15169 During the investigation I found evidence of illegal burning of tires in a makeshift incinerator. I also found evidence of a regulated renovation on Main St in Lowry City that had yet to be inspected for asbestos. A Letter of Warning was sent out on October 10, 2025 requiring proof of proper disposal of the incinerator waste and an asbestos inspection of the buildings being renovated on Main St. As of October 22, 2025 the owner, Ron Knight, and contractor, Logan Orr, hired ALM Environmental Services to conduct an asbestos inspection of the buildings in question on October 14, 2025. The inspection results included a positive test for asbestos in linoleum and floor tile/mastic on 308 Main St. Knight and Orr have been advised to follow proper asbestos abatement protocols if they are to conduct work on these non-friable materials. Orr also provided proof of proper disposal for the regulated waste found inside the incinerator.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
63075	9/19/2025	9/19/2025	Saint Michael's Veterans Center	Other	Kansas City /Jackson	KCRO	MC	Other

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
63076	9/24/2025	9/25/2025	Kyle Fraser	Open Burning	Warsaw /Benton	KCRO	CK	Phone Conversation
Concerned Party:		Monica Kellner						
Concern Info:		Issue first noticed September 22. Source of concerns trailer partly burnt alleged because drugs, the fire department came by and put it out. Now they are taking off the pieces and burning it in the yard (siding, insulation, electrical wire). CP says that they have had run ins with the law for drugs and the source of concern recently got back from prison. CP was told about the illegal activities by someone else. Previous night was the last time CP saw them burning but is pretty sure they will be burning more. Said that neighbors have been unable to sit outside because it is so smokey. CP says that the burn area can be seen from the road and is at the end of the trailer on the side closest to the road. [sic]						
Conclusions:		No active burning was observed during the investigation; however, a burn pile was observed indicating the responsible party may be burning demolition waste from the trailer, which was previously involved in a fire. The fire department reports the trailer burned due to an outside fire spreading out of control. The responsible party was reportedly burning prohibited items, including a mattress. I was unable to make contact with the responsible party during the investigation. Regulatory information will be sent to the property address. Local fire and law enforcement agreed to notify the department if continued prohibited burning is observed.

63262	9/17/2025	9/22/2025	Pamela Enriquez	Open Burning	Jefferson City /Cole	NERO	DB	Site Visit
Concerned Party:		Anonymous						
Concern Info:		Email states, "A neighbor located at 603 Houchin st, Jefferson City Missouri, is burning household trash which includes plastic, spray cans, furniture, diapers, etc. She burns once or twice a week behind the house. We hear stuff exploding while she's burning and the stuff she burns will burn for several hours. The smell is so overwhelming that it's hard to breathe and it seeps into our homes. It's caused us to cough for several days afterwards and have headaches. The police have been called and have made her put it out or they will put it out if they can't get any answer at her door. She also has a washer hose that drains out of the back of the house onto the ground. There's a fire burning as I write this." [sic]						
Conclusions:		No violation found at the time of the investigation. Provided info. At the site, left info packet. Spoke with man who did not identify himself, but was in the house. He said his girlfriend lives there and burns household waste. I observed household waste in the burn pile. Junk nearby, but did not appear burned. Aluminum partially separated out. HH waste in burn pile included plastic and glass. I recommended burning be limited to daytime and to be considerate of neighbors. He said he would inform her and pass on the info packet.

63269	9/12/2025	9/17/2025	Janis Hammershmidt-Griffin	Open Burning	/Jefferson	SLRO	JC	
Concerned Party:		Hematite fire district						
Concern Info:		A member of the fire district called about an individual who has been repeatedly burning near an apartment complex for the last year. He believes the RP is loading a box truck daily and disposing of it through open burning. The CP stated they have seen shingles and mattresses in the piles. They have provided the open burning regulations multiple times, but the RP has not stopped. The RP has begun burning over night to avoid being caught and has constructed a fence to hide the material form view. [sic]						
Conclusions:		Based on the fire reports and the contents of the burn pit, I am issuing a Letter of Warning to 13075 State Rd CC.

63272	9/11/2025	9/16/2025	Residential	Open Burning	/Lincoln	SLRO	LZ	
Concerned Party:		No name given						
Concern Info:		We recieved an open burning concern from the DNR website. The Cp states: At 69 Eldorado Drive, Moscow Mills, MO (Lincoln County), the residents repeatedly burn materials that give off a very strong smoke odor (garbage, leaves, cigarettes). The odor is strong enough to seep into neighboring homes and cause headaches. It also lingers outdoors in the surrounding area for 1–2 days after burning. This has been happening for years, several times each year. Please investigate. [sic]						
Conclusions:		I conducted a site investigation and I did not see any signs of open burning.

63276	9/19/2025	9/22/2025	Aurora Organic Dairy	Odor	Columbia /Boone	NERO	DB	Site Visit
Concerned Party:		Kasey Vickers						
Concern Info:		Odor concern at Aurora Dairy Processing on Waco Rd in Columbia, states employees at neighboring facility are having physical symptoms from the odor and nausea. Odor type is earthy or musty, rancid or rotten, sewer. Date odors were experienced was Tuesday Sept 16, 9:00 AM for more than 2 hours. [sic]						
Conclusions:		At site, found no odors except light smoke smell from sausage factory. Spoke with Justin Stuart, discussed concern. He stated that two months ago they changed to a chemical treatment process that cycles daily so the milk does not have time to spoil. He stated the city was working the drains recently, which may have caused odors as described by the complainant. No known issues at the plant the day of the concern.

63288	9/19/2025	9/22/2025		Fugitive Particulate Matter	/St. Louis	SLRO	RA	
Concerned Party:		Anonymous						
Concern Info:		MSC 9/19/2025: Caller wished to remain anonymous. The CP stated that they are experience dust leaving a development area and going onto their property. The location of Concern is at the corner of Susan Rd. and Telegraph with a gas station located at this address 6161 Telegraph Rd, Oakville, MO 63129 directly to the west as a point of reference. The concern was stated to be located in unincorporated St .Louis County. The dust is worst on windy dry days and can be experienced all day. Code enforcement has been called and the DNRs Stormwater unit has also received a concern for this property. The development company is currently unknown by the CP. I informed that the CP that this concern may be referred to St. Louis County Air Program and gave the appropriate contact information in case they wished to check in on the state of the concern in the case of referral. I also gave directions how to inquire about the concern with our office. [sic]						
Conclusions:		The concern location was located in St. Louis County. I referred the concern to St. Louis County Dept of Public Health APCP.

63292	9/16/2025	9/22/2025	McBride	Fugitive Particulate Matter		SLRO	LZ	
Concerned Party: Anonymous Concern Info: We recieved an anonymous concern from the EPA. The CP states: •Starting about a month ago the alleged violator began demolishing buildings, including an old school house, and they didn't use any water during the demolition. They haven't done any top soil remediation of potential lead (Pb) paint or asbestos that got into the soil. Upon researching, the informant found that McBride has a track record of not conducting activities per regulations/codes. •This lot is also on an old Superfund site and the informant believes that contaminates was left on-site, which is why it sat vacant for a long time. The informant thinks that once demo is done the alleged violator plans to start construction on the site. •Informant is concerned that soil contamination is being disturbed and the builder is not letting the neighbors know about potential hazards and what neighbors should do to protect themselves (like keeping windows closed, don't let children play outsides, are masks needed, etc.). •First Alert 4 news station aired a story on 9/2/25 (about the positives about development finally occurring) and you can see in the background some of the demolition that is occurring. •The informant tried to discuss their and their neighbor's concerns with their alderman, but didn't get the impression he was taking them seriously. •The informant would like a call back to learn more about the Superfund site, what contamination is potentially still there, and what the neighbors should do to protect themselves with the soil being disturbed. They would also like to know what requirements there are on notifying neighbors of potential hazards associated with site activities. •The informant would also like to see site activities be put on hold until it can be determined if the potential violator is doing things correctly and neighbors are educated on the potential hazards. •Other than a call back per above mentioned questions, the informant would like to be kept anonymous [sic] Conclusions: No violations of particulate matter emissions originating from the site at the time of my visit.

63368	9/12/2025	9/16/2025	Lake Burger	Bypass or Sewer Overflow Odor	Gravois Mills /Morgan	CFO	KF	Referred to Other Agency
Concerned Party:		Anthony Wood						
Concern Info:		Anthony called and said that on August 31 he and his family were eating at Lake Burger and they had a horrible smell in the area. He saw one green "manhole" tank lid that had water coming out of it. He stated that it was in-between the restaurant and a residential home. He said the water was making it to the lake. [sic]						
Conclusions:		Left a voicemail. Called Jim Miller - Morgan County Health - 573-378-5438 x1010. Jim Miller said he would check on it and get back with me. 9/25 - Jim Miller said that the owner had the septic tank pumped and hauled before and after the Labor Day weekend. Jim Miller said that the pool backwash filter drains across this area. The sewer is to be connected to Gravois Arm Sewer District this winter. Not an issue at time of Jim Miller visit.

63372	9/25/2025	9/26/2025	Josh Stebbins	Open Burning Open Dumps	Poplar Bluff /Butler	SERO	BC	Referred to Other Agency
Concerned Party:		Kyle Johnson						
Concern Info:		CP states RP is burning several different types of waste items such as plastic, metal, copper wire, durable goods, etc. and then scraps metal that is left over from burning. CP believes the items that are being burned are stolen. CP states they have spoken with the City of Poplar Bluff, Police Department, and the Fire Department on several occasions to address these issued but the RP just pays the fine and continues to burn. CP states the RP has begun to pile up the ashes and debris from the burning along a fence line that borders the CP's property. CP also states they believe the RP is burying the ash and debris left over. CP states the City of Poplar Bluff encouraged them to reach out to the department. CP states RP has history with police in town and has previously had dogs attack people in past. [sic]						
Conclusions:		This concern has been refered to the City of Poplar Bluff Code Enforcement department for investigation and enforcement of the city ordinances.

Concerned Party:		Kelly Leahy						
Concern Info:		Via Webform email - Submitted at 3:23 pm Wednesday, October 8, 2025 - Date of Incident or Date First Noticed: 10/07/2025						
		I witnessed an older model black Saturn car on Broadway near 13th Street belching excessive dark colored and foul-smelling emissions. The car was driving slowly with a single young-ish person inside. Other drivers were avoiding the car because of its slow pace and also the heavy black smoke. I felt sick to my stomach getting near it. It was probably the worst car emissions I've ever seen - and I'm 63! [sic]						
Conclusions:		This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program (KCAQ). When I referred the concern, I asked if this something KCAQ or any other city department would be able to address; if not, I would send to EPA since we don't handle mobile source emissions.						
		KCAQ responded that they went to the area that morning after receiving the concern, patrolled the area, and did not locate the reported vehicle.

63531	10/8/2025	10/8/2025	Corner Land LLC	Open Burning	Wheatland /Hickory	SWRO	JW	Phone Conversation
Concerned Party:		Central Hickory Fire Rescue Headquarters						
Concern Info:		Wheatland Fire Department called to report that the two story house located at 18993 W 4th Ave was torn down and burned. They received a call from the Casey's located at 19024 US-54 that reported that an individual wandered into the gas station with a 5-gallon gas can, filled it up, and mumbled about something catching fire. A few minutes later, the Casey's reported that two fires were ignited at the property located across the street. Wheatland Fire Department responded and found one individual there who said that they were hired by the property owner to tear down the house and light it on fire. It was reported by this individual that they had received permission from the City of Wheatland, but the fire department confirmed this was not true. The property owner is someone named Daniel and two phone numbers were provided, 469-500-3747 with Corner Land LLC, and 417-327-6517. The property owner owns a manufacturing business just outside of Wheatland called Snyder Equipment Co. [sic]						
Conclusions:		CON-105 The fire department will contact APCP if open burning of demolition waste happens on the property. No action is required.

63544	10/7/2025	10/7/2025	Total Pelleting Solutions nate@totalpelletingsolutions.com	Fugitive Particulate Matter	Aurora	SWRO	JW	Communication In Person
Concerned Party:		Jackie Mayne						
Concern Info:		Caller states that Total Pelleting Solutions is consistently releasing excessive dust out of its cyclone on the west side of its facility during the night. The caller has sent photos and videos of the dust. The caller alleges that the dust gathering on her vehicle is all from Total Pelleting Solutions. The caller supposedly has to wash her vehicles every week. The caller is concerned about the health impacts of inhaling the blue-colored dust. [sic]						
Conclusions:		CON-127 During the investigation I found evidence of fugitive particulate matter found on surfaces beyond the property line due to handling of pelleting material. This is a violation of 10 CSR 10-6.170 and the required actions for return to compliance are a SSM notice or a written response explaining the facility's plan to prevent reoccurrences of the violation. On October 30, 2025 a sufficient response was received to the required actions of the NOV. A CSU letter was issued on November 6, 2025 and no further action is required.

63570	10/15/2025	10/16/2025	Lee's Summit Resource Recovery Park	Odor	Lee's Summit /Jackson	KCRO	CK	Communication In Person
Concerned Party:		Anonymous						
Concern Info:		Caller concerned about the odor coming off of the composting operation at the lees summit resource recovery park. Call was not sure if it was that, the landfill, or the onsite transfer station. The caller stated that they can hear heavy machinery from the close by neighborhood where they live. They stated that the smell is the worst in the morning between 7:30 and 8:30 AM. The caller stated that they don't notice it as much in the evening hours. I stated that it was likely the composting operation that takes place on site. [sic]						
Conclusions:		The resource recovery park had a compost fire on October 13, 2025, which likely contributed to the odor concern. The pile was still smoking some during the site visit on October 16, 2025. While a noticeable odor was present, it was not strong enough to violate the odor regulation. Site personnel are monitoring the issue and believe it is under control.

63719	9/18/2025	9/24/2025		Open Burning	Hillsboro /Jefferson	SLRO	MC	
Concerned Party:		Anonymous (but would like to be updated)						
Concern Info:		A caller (who wishes to remain unnamed but would still like to be updated on the progress of this concern) wanted to report a concern regarding their neighbor burning trash. It was been happening for the last couple of years, at least a couple times a week, any time of the day. The neighbor has been burning plastics, aerosol cans, trash, and other miscellaneous debris. The caller has lung issues and suffers with asthma so the burning affects them more than the surrounding neighbors. Speaking of the other neighbors on the street, the caller stated that they, as well as others, have called multiple agencies regarding this issue. This is occurring in Hillsboro, and they have called the Jefferson County Health Department (who said they can't do anything), Jefferson County Code Enforcement (haven't heard back from them), the Sheriff's Department (who referred it to the local fire department). The Goldman Fire Protection District (located north of Hillsboro) has gone to the site several times, logged many citizen complaints, and would be able to share their file and reports with the investigator. The fire department told the caller that DNR would be able to further assist. The caller is unsure of the exact address of the neighbor that is doing the open burning but that it would be listed in the fire report(s). [sic]						
Conclusions:		9/18/25-RLA- I reached out to Goldman Fire Department and Dennis was able to give me the address. Dennis was very familiar with the site and they were willing to give us Fire Reports when we request them. The burn piles are in the back of the property and we will not be able to see it from public right of way. Dennis mentioned they have burned furniture as well as household trash. 9/19/25 TJT - The CP called again while I was on phone duty to report that the Jefferson County Sheriff's Department was out at the RP's house in regards to the burning/meth related matter. She said the Sheriff's Department would be able to provide a report regarding the situation. I let the caller know that Robert Andrews talked with the fire department and the concern was also assigned to an investigator and that I would update the form. The caller said they would call SLRO with any further updates. MSC 9/24/2025: I visited the SoC and saw no evidence of open burning from the public roadway. I called the fire chief (Curtis Peters) of Goldman Fire Dept. as they have responded to this property. I gave the Chief my contact information and stated that if they had incident reports I could utilize them in my investigation and potentially issue violations based off those findings. The Chief stated he would look at the files. MSC 10/15/2025: I called the fire chief of Goldman Fire Dept. to see if he still wanted to send any incident reports for my review. It was stated that the property has not been a problem and that if they ran into anymore issues, he would document the incident reports and send them to me if the burning continues to be a problem. MSC 10/16/2025; there have been no further concerns received by the department for the SoC.

63722	9/17/2025	9/18/2025	M Turpin Services	Fugitive Particulate Matter	Wright City /St. Charles	SLRO	LZ	
Concerned Party:		Joseph Parkins						
Concern Info:		Josheph Parkins stated that due to construction in his neighborhood, dust and dirt have been a breathing hazard. He stated that it has been causing health issues in his household. Parkins stated that initially trees were cleared off the space about a month ago, but that the soil work started at the beginning of this week (9/15/25). He stated that he has contacted both the EPA and OSHA. [sic]						
Conclusions:		I investigated the concern on September 18, 2025. I saw M Turpin Services land excavation company, a contractor hired by a home builder company permitted by the City of St Peters to build residential homes at the corner of Jungerman and Omar Ct in St Peters 63376. They were leveling and grading the ground. The ground was wet, and I did not see dust coming from the site at the time of my visit. I called the M Turpin Company. They told me they will finish the excavation work in one to two weeks time. The home builder will start the construction. I told them that the state regulation prohibits migration of dust from the construction site beyond the property line. Even though there was no dust I can see today, residents in the area have concern about dust migrating to their properties. They told me if needed they can use watering to address the issue. I called the city of St Peters to let them know the issue raised by the residents and to find out if there are conditions in the construction permit the city issued to the builder that address dust issues. No one took my call. I left a message. Finally I called the CP to let him know my findings. I left a message.						

Concern No.	Date Received	Investigation Date	Suspected Source Owner/Operator	Concern Type	City/County	Region	Inspector Initials	Final Action
63723	9/23/2025	9/24/2025	3300 Hall Street	Fugitive Particulate Matter Hazardous Air	St. Louis /St. Louis City	SLRO	LZ	
Concerned Party:		John Gunther						
Concern Info:		We received an environmental concern via email. The CP alleges that mist with oil is being emitted from an industrial fan at Western Blow Pipe and their address is at 3300 Hall Street, St. Louis. [sic]						
Conclusions:		I, (Lemma Zewdie) investigated the concern on September 24, 2025. I met Lori Govreau (314 -832 5700, lgovreau@westernblowpipe.net)), the office Manger there. I told her the reason for my visit and asked her to walk me through the facility. The facility is operating a stainless-steel aluminum welding facility. The current owner purchased the facility in 2019. The business has been operating at this location since 1895. The operation include metal cutting to size, welding, parts cleaning (tumbler and sand blasting). Equipment includes water jet cutter, plasma cutter, rollers, tumbler (parts washer that uses pebbles and water and not solvents), sand blaster, and metal saws. There was no emergency generator or boiler on site. No painting of parts is conducted here. They have 6 exhaust fans that vent outside. One of the metal machining equipment has venting system where the dust from cutting and shaping metal parts and smoke from the heat is vented outside on the east side of the building rather than through the roof of the building pointing toward Gunther Salt Company . Talking to the concerned person, (Darrin Chapman, Plant Manager at Gunther Salt Company), venting on the side of the building towards Gunther Salt Company blows fugitive dust from Western Blow Pipe Company. Lori Govreau realized this is as a potential source of dust that may migrate beyond their property line. Govreau told me that they are going to either vent through the roof or containerized the dust that is vented out. At the time of the inspection, the machining system connected to the venting was not operational and no dust was observed coming out from the building.

63770	9/18/2025	9/18/2025	Windfall Estates MHP sewer system	Odor		SLRO	CM	
					/Franklin			
Concerned Party:		Patrick Pazour						
Concern Info:		Patrick Pazour an Evergreen Lake subdivision resident called to report overpowering odors coming from the neighboring Windfall Estates MHP sewer system. Patrick noted that there have been recent odor concerns filed about the Windfall Estates MHP sewer system. [sic]						
Conclusions:		I had previously visited the site on September 17, 2025, to follow up on another concern at Windfall Estates for an odor complaint. When I arrived, I heard the blower motor operating, but the aeration basin was not being aerated, nor were any of the air lifts or surface skimmers operating. The contents of the extended aeration basin were grey with a sewage odor. The wastewater effluent from the outfall pipe was grey with black, septic solids in the stream bottom. While on site, I called and spoke with Josh Willison, my direct supervisor, and told him about my findings. I requested that he contact Water Resources Management, the contract operator for the facility, to have it addressed, and he said that he would. I collected a grab sample and placed an automatic composite sampler for collection of a sample for BOD, Total Suspended Solids, and Ammonia as N. I travelled to the Evergreen Lakes subdivision to observe the receiving stream. The stream had black, septic water flowing towards the lake. I smelled a septic odor within the immediate area of the stream. I collected a grab sample within the stream for laboratory analyses of Ammonia as N and E. coli. I returned to the facility on September 18, 2025 to retrieve the composite sample. The blower motor was operating with the basin being aerated. I called and spoke with the concerned party on September 18, 2025, to follow up. I told him about my findings and my site visits to the facility. I also provided him with the contact information for Elizabeth Cahalan, the case manager for the facility to follow up with.

63829	10/6/2025	10/6/2025	Residential	Open Burning	Marthasville /Warren	SLRO	JC	
Concerned Party: Jim Peasel Concern Info: We received an open burning concern from the DNR website. The CP states: The location is 16984 REBECCA lane Marthasville mo 63357 my home is 16941 Rebecca lane A few yards from my property line on side of my home where heat pump is located my neighbor has a burn pile where I see ashes from previous fires and another pile of plastic trash. in the burn pile already burned I have pictures of concrete bags hes planning on burning. I have two children living with me and the burn pile is across from our deck "I have attached and described photos showing what appears to be illegal burning of construction debris near my property line. I want to clarify that I have not spoken directly with my neighbor about this situation because past interactions have been contentious. He has previously recorded me and tried to provoke reactions, so I am concerned that any direct confrontation could escalate the situation or be misused. For that reason, I am seeking assistance from your office rather than trying to address it myself. If not hazardous, I have no concern , other than his flames blow over. im under impression the bags are toxic and hazardous. I have pictures. but looks no place to attach here. Thznkyou for your attention to this matter [sic] Conclusions: 10/6/2025-JMC- I arrived at the site at approximately 10:30 AM. The given address had a gate and a "no trespassing sign." I talked with the CP, Jim Peasel, who let me onto his property to view the pile. I saw an area where a previous burn took place, however, I could not tell the contents of the fire. There was a pile of cardboard and "Quickrete" bags near the burn pit. The items did not appear to be burned. 10/7/2025-JMC- The Warren County Assessor's office has not updated the property owner. The owner is listed as the previous owner who is deceased.

Concerned Party:		Anonymous						
Concern Info:		We received an anonymous environmental concern from the DNR website. The CP states: It looked like there were excessive emissions from the building. The building is near the river. [sic]						
Conclusions:		10/14/25-RLA- I looked up the address and it is the same address as American Italian Pasta Co (510-2433). This facility has an intermediate permit. 10/16/2025-JMC- I arrived at the facility at approximately 10:20 AM. I drove around the facility, and did not notice any opacity or fugitive dust in the area. I parked in a lot to the northwest for roughly 10 minutes. I observed one steam emission point. I did not detect any odors. I entered the property and spoke with a plant operation manager. He informed me that the facility was fumigated the previous weekend. The plant periodically fumigates its flour silos as a preventative action for bugs. To do this, they clean out the flour silos and tent the area. The prep for the fumigation occurred on Friday, when the CP submitted the concern.

63844	10/14/2025	10/21/2025	church	Asbestos	Crystal City /Jefferson	SLRO	MC	
Concerned Party:		Anonymous						
Concern Info:		We received and anonymous asbestos concern from the DNR website. The CP states: First Baptist Church Festus- Crystal City has known about the asbestos in the basement tiles and likely other things for a while. Tiles were previously replaced before anyone knew, sometime in the last 10 years. This issue was brought up to the maintenance man who worked there until September 2, 2025. He stated a licensed company would need to be hired to do the work, as he cannot do it. Samples were taken by a flooring personnel to verify. However, the maintenance man left employment of the company shortly after. Now we have learned a volunteer is taking on this work. Executive pastor has been notified of the issue but is proceeding anyway. This is going to put the whole congregation at risk. [sic]						
Conclusions:		10/14/25-RLA- I checked our records and we have not had any asbestos notifications come in from Crystal City in the past two years. MSC 10/21/2025: I visited the property at the SoC address I was directed to the office, no one was available in the church office. I left contact information. I viewed the entire perimeter of the site and saw no evidence of construction of demolition actives (dumpster containing construction material, equipment, workers). MSC 10/24/2025: I called and left a voice mail with the church office asking if they could reach out. MSC 10 27/ 2025: The site representative, Kathleen, stated that there was no renovation occurring on site and that she confirmed this with the pastor. I stated that if we received further concerns, we would continue to investigate the site. I explained that the concern involved asbestos from the basement area and any further concerns will continue to be investigated.

63865	10/8/2025	10/10/2025	BMC Stone	Fugitive Particulate Matter	Defiance /St. Charles	SLRO	JC	
Concerned Party:		TD Ward						
Concern Info:		TD Ward stated that BMC Defiance Quarry is not providing dust control and it is inundating the area. He stated that there is a new owner and that they have are not providing any dust controls. [sic]						
Conclusions:		I found sufficient evidence that proper haul road management was not occurring. I am issuing BMC Stone a LOW

63866	10/15/2025	10/15/2025	Defiance Quarry	Fugitive Particulate Matter	 /St. Charles	SLRO	JC	
Concerned Party:		Anonymous						
Concern Info:		I live in Defiance MO, and the nearby quarry at Highway 94 and DD gets dust on the roads which is dispersed by trucks and settles on everything including trees and building. The is being dispersed both day and night and is causing breathing issue for me and my neighbors. I will to remain anonymous. [sic]						
Conclusions:		A site visit was conducted on 10/15/25. Violations were identified and a LOW will be issued to BMC Stone.

63868	10/1/2025	10/10/2025	David Breeden	Open Burning	 /Gasconade	SLRO	MC	
Concerned Party:		Larry Hoemer						
Concern Info:		The concerned party (CP) alleges that a city worker (City of Gasconade) is burning on their property. The CP states that the fire department was contacted and he expects a response, but he wants DNR to respond too. The CP stated that someone from the SLRO was at the site approximately 1 month ago. The CP would like for an investigator to contact him prior to coming out and he will meet with the investigator so that he can point out the area where the burning is occurring. [sic]						
Conclusions:		No violations were cited during the investigation; however, evidence of open burning was apparent via scorch marks. However, contents were indiscernible. A CA letter and fact sheets on open burning will be supplied to the SoC. The CP was asked to contact the office if improvements were not seen by the initial action.

63869	10/8/2025	10/14/2025		Other	/St. Charles	SLRO	LZ	
Concerned Party:		Celeste Custer						
Concern Info:		We received a idling concern from an email to the SLRO office. The CP states: Morning, I live in St Charles MO 63301 and I'd like to report idling trucks in my neighborhood. Every morning starting around 5 am until 8am there's many trucks that sit idling for much longer than five minutes. I've tried opening the observation tool however it hasn't uploaded as it should. Thank you for your time, we need clean air. Celeste Custer 50 Brookside drive [sic]						
Conclusions:		I conducted a site visit in the morning of October 14, 2025. I did not see any diesel trucks at the provided address.
